DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by French reference 2 785 972.

Regarding claim 1, French reference '972 discloses a junction structure for connecting two profiles wherein a first profile has at least two planar, parallel sides and a second profile includes two parallel, opposite girders and at least one strip connecting the girders, wherein the girders with their lateral ends project relative to the at least one strip, these projections forming paired parallel flanges wherein the first profile at a location of connection has a recess into which the second profile is inserted on a front side such that parallel sides of opposite ends of the first profile limiting the recess rest in a form fit against insides of opposite flanges of the second profile and are connected thereto, and wherein the first profile has a connecting projection in a vicinity of the recess on a side facing the front side of the inserted second profile.

Allowable Subject Matter

3. Claims 2-10 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

4. Applicant's arguments with respect to claim 1 have been considered but are moot in view of the new ground(s) of rejection.
